

Personalized Learning Internet Safety @ Home

Overview

This inservice will focus on Internet safety at home. The evening session will cover topics such as surfing websites, video conferencing, instant messaging and email. Laptop strategies will also be addressed. If you have Internet questions or would like to learn how you can better assist and monitor your child at home, this session will be applicable to you. Feel free to bring your child's laptop if you would like to learn more about this technology and how to effectively use it.
